Comments emailed to Commission staff are not considered part of the Commission record.

The Commission's Rules of Practice and Procedure require all intervenors filing documents with the Commission to serve a copy of that document on each person whose name appears on the official service list for the project. Further, if an intervenor files comments or documents with the Commission relating to the merits of an issue that may affect the responsibilities of a particular resource agency, they must also serve a copy of the document on that resource agency.

k. **Description of Request:** The licensee seeks approval to decommission and remove from the project license the 450-kilowatt generating unit at the Slab Creek Powerhouse, a component of the Slab Creek/White Rock development. The applicant states that the benefits of the powerhouse do not outweigh the costs to rehabilitate the inoperable generating unit, which was damaged during a flood in 2017. No ground disturbing activities would occur. The licensee would permanently close the turbine water supply, remove water piping and oil containing equipment, and abandon the unit in place. The powerhouse would remain in place and the penstock would be retained and supply the required minimum flow releases.

l. **Locations of the Application:** This filing may be viewed on the Commission's website at <http://www.ferc.gov> using the "eLibrary" link. Enter the docket number excluding the last three digits in the docket number field to access the document. m. Individuals desiring to be included on the Commission's mailing list should so indicate by writing to the Secretary of the Commission.

In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be received on or before the specified comment date for the particular application.
